

WEEK IN REVIEW

Aug 14, 2020

The Bottom Line

- U.S. stocks gained for the third week in a row, albeit just slightly, with the headline S&P 500 Index up +0.6%. U.S. Treasury yields had their largest weekly gain since March.
- In Washington, lawmakers seem unable to advance on a coronavirus stimulus bill. This could drag on for weeks as the Senate is in recess until after Labor Day and House members have already left for the rest of the month.
- Fresh economic data, including unemployment claims and retail spending, continue to suggest the economy is recovering, but at a slower pace, begging the question of whether the recovery can persist without more stimulus.

Recovery signs persist, but no stimulus yet

U.S. Treasury yields and stocks rose on positive economic data but were tempered by uneasiness surrounding the continued uncertainty regarding the timing, size and scope of a new round of U.S. fiscal relief. Hopes that a fiscal stimulus deal could be reached in August have gone from slim to none as lawmakers have left Capital Hill for the rest of the month. The benchmark 10-year Treasury yield rose 15 basis points to 0.71%, but the biggest move was on the long end of the curve as the yield on 30-year Treasuries rose 24 basis points to 1.45%, their highest level in more than seven weeks. Core consumer prices in the United States (excluding food and energy) jumped the most since January 1991. U.S. Jobless claims dipped below one million for the first time since March. Retail sales, ex-autos, came in stronger than expected, industrial production continued to recover, and Q2 productivity jumped. Former Vice President Joe Biden named his running mate, Sen. Kamala Harris, on Tuesday, clarifying the Democratic presidential ticket. President Trump announced that the United Arab Emirates and Israel agreed to establish formal diplomatic relations after Israel agreed to suspend plans to annex parts of the West Bank.

Digits & Did You Knows

FRIDAY NIGHTS - As of 8/04/20, 28 states have delayed the start of the 2020 high school football season, including 10 states that will begin play in the spring of 2021. However, 4 of the 6 classes of athletic teams in Texas will begin their regular season on 8/27/20 (source: High School Football America, BTN Research).

VIRUS TAX - California is considering implementing an income tax surcharge effective in 2020 that would levy an extra tax of 1% to as much as 3.5% on incomes in excess of \$1 million. The extra revenue would offset the state's additional expenses incurred in response to the COVID-19 pandemic (source: CA Assembly Bill 1243, BTN Research).

Market Snapshot	Index Level	1-week Price Return	2020 Price Return
EQUITIES

Chart of the Week

Economists surveyed this month by The Wall Street Journal saw the economy rebounding +18.3% on an annualized basis in the third quarter, following the -32.9% drop in the second quarter. That was higher than their July forecast of a +15.2% third-quarter recovery. At the same time they reduced their forecasts for the following four quarters, indicating they foresee a long recovery. An overwhelming majority of economists surveyed said the economic benefits of additional jobless benefits to assist the unemployed outweighed concern that the extra payments could deter people from going back to work. Many economists said the extra payments both boosted spending and partly inhibited people from returning to work.

Diminishing U.S. Recession Odds

Economic Rundown

- The July **Employment Trends Index (ETI)** is going in the right direction with its third straight monthly gain, up 2.9%, but remains -53.8% below its July 2019 level. Meanwhile, the June **Job Openings & Labor Turnover Survey (JOLTS)** showed job openings increased +9.6% to 5.9 million, but hires fell -7.0% to 6.7 million.
- The July **OECD U.S. Composite Leading Indicator (CLI)** jumped another 1.5 points to 97.5, its third gain in a row.
- The July **NFIB Small Business Optimism** Index fell 1.8 points on concerns about the economy and sales growth.
- In July **Producer Price Index (PPI)** for final demand jumped +0.6% in July, the most since October 2018. **Consumer Price Index (CPI)** spiked +0.6%, the most since June 2009. Both inflation measures were twice what economists forecasted.
- The **Reuters/Univ. of Michigan Consumer Sentiment Index** was essentially flat in August.
- July **Retail Sales** were up +1.2%, the third gain in a row, below expectations for +2.3%, but now above the pre-pandemic high.

- **Initial Jobless Claims** fell -228,000 last week to 963,000, below expectations of 1.1 million, and the lowest level and below one million for the first time since March.
- **Import Prices** rose in July for the third month in a row.

The Week Ahead

Monday	<ul style="list-style-type: none"> • NY State Empire Manufacturing • NAHB Housing Market Index • Treasury International Capital (TIC) Flows
Tuesday	<ul style="list-style-type: none"> • Building Permits • Housing Starts
Wednesday	<ul style="list-style-type: none"> • MBA Mortgage Applications • FOMC Meeting Minutes
Thursday	<ul style="list-style-type: none"> • Jobless Claims • Philadelphia Fed Business Outlook • Conference Board US Leading Index
Friday	<ul style="list-style-type: none"> • Markit Purchase Managers Indices (PMIs) • Existing Home Sales

The Importance of Diversification. From period to period there is no certainty what investment will be the best performer... or the worst. Diversification mitigates the risk of relying on any single investment and offers a host of long-term benefits, such as lowering portfolio volatility, improving risk-adjusted returns, and helping investments to compound more effectively.
